

APPLICATION

Your grow chart ruler decal will come “weeded” (the waste bits between the good pieces removed). App tape will cover the front. App tape (short for “application tape”) is a wide adhesive sheet similar to masking tape. App tape allows floating pieces (not connected to other pieces) to maintain alignment, and makes installation easier.

Remove the vinyl backing paper.

Apply the sandwich to your clean target surface. Rub firmly to make the vinyl stick.

Remove the app tape. Finished!
