

Artwork for lanyards must be **vector**. Use professional vector programs like Illustrator, Coreldraw, or similar. PhotoShop is **not** capable of making vector art. Home programs like MS Word/Publisher, Excel, and Powerpoint are not capable of making vector art.

### ① Use the **allBIZ ONLINE EDITOR**

Lanyards are printed in 1 Colour. Logos **MUST** be vector (made from lines) and **NOT** an image. We can assist changing your image into lines (individual file details vary.)

### ② Use **ILLUSTRATOR** (or other vector software)

1 - **PAGE SIZE:** (see below), **BLEED AREA:** 0mm

2 - **SAVE AS:** PDF (best if /X-1A). Tick “**Trim/Crop marks**” and “**0mm bleed**”

**MORE INFO PAGE 2**

### **MAKE SURE YOUR FILES ARE PRINT READY!**

- PDF** (PDF/X-1a is better)
- FONTS** embedded (or converted to Curves/Paths/Outlines )

# SHORT RUN LANYARDS

## Do It Yourself

If you have to create the file manually using other software, your finished file should match the specs below. Pages sizes:

10H x 290W mm (for 1 Up)

10H x 135W mm (for 2 Up)

10H x 85W mm (for 3 Up)

10H x 60W mm (for 4 Up)

Make ONE logo/text block, any width up to the maximum. We will repeat ("step up") as necessary to fill the lanyard, with appropriate spacing between.

## Making your art 1 Colour

Some logos work well as one colour, others have to be altered. ALL art MUST be Vector (lines), images will NOT work. (For a small charge we can assist.)
