Do It Yourself

MAGNET - FRIDGE

For best results, use professional vector programs like Illustrator, Coreldraw, or similar. Home programs like MS Word/Publisher don't have the right tools or colour palette. MS Excel is for spreadsheets. MS Powerpoint is for screen slideshows. PhotoShop is for editing bitmap images.

1 Use the allBIZ ONLINE EDITOR

Put **bleed*** items right to the very edge of the drawing space (they should go beyond the red CUT MARGIN)

- * BLEED: any object that goes right to the edge of the document. The object must actually go BEYOND the finished size by 3mm ("bleed over" the edge).
- (2) Use **ILLUSTRATOR** (or other vector software)
 - 1 PAGE SIZE: see Page Two for different sizes BLEED AREA: 3mm
 - 2 SAVE AS: PDF (best if /X-1A). Tick "Trim/Crop marks" and "3mm bleed"

MORE INFO PAGE 2

PDF (PDF/X-1a is better) - for double-sided, Page 1 = Front, Page 2 = Back
FONTS embedded (or converted to Curves/Paths/Outlines)
igsquare IMAGES 600 to 300ppi (less resolution and they will print fuzzy and blocky)
☐ CMYK colour only (do not use RGB or Spot or mix them)
FLATTEN transparencies/lavers (or you will get odd stripes/blocks)

MAKE SURE YOUR FILES ARE PRINT READY!

Your job could be **ruined** by bad files. Fuzzy, wrong colours/fonts, missing bits and more. Wrong files could be **rejected/charged a processing fee.**

	BLEED - 2 or 3mm, and 3mm Safe Area away from edge for text
ſ	TRIM BOX (for bleed jobs) - set to final cut size (or your job will cut wrong)

Do It Yourself

MAGNET - FRIDGE

If you have to create the file manually using other software, your finished file should match the specs below:

Other Page Sizes: (add 3mm bleed, either auto in Illustrator or manually by increasing page size)

40 x 40mm

MANUAL:

PAGE SIZE (with crops): 54x54mm

BLEED: 46x46mm SAFE: 32x32mm

50 x 50mm

MANUAL:

PAGE SIZE (with crops): 64x64mm

BLEED: 56x56mm SAFE: 42x42mm

50 x 70mm

MANUAL:

PAGE SIZE (with crops): 64x84mm

BLEED: 56x76mm SAFE: 42x62mm
